

**Kyoto Electronics “KEM” Partners with Oleinitec to Distribute
laboratory density meters, titrators, refractometers in Scandinavia**
New dealer complements direct sales and service activities

STOCKHOLM, Sweden (1st of August 2011) – Kyoto Electronics (“KEM”) has endeavored as a specialized manufacturer of scientific instruments since 1961 introducing a broad product line of analyzers of high quality and reliability including Analytical and Measuring Instruments that addressed laboratory needs of the time and Continuous Monitoring System that has met ever demanding environmental protection.

Oleinitec is a Scandinavian-based company group located in Sweden, Denmark and Finland. More than 30 years ago, the company has started to establish advanced measuring technology into various markets as well as acting as a link between industry and academia.

When being asked for a statement about the cooperation, Marlene Jegeborn, managing director with Oleinitec, commented: “The Kyoto Electronics portfolio offers fits right into the needs of our customers and this will enable us to further expand our solutions for both industrial and academic markets. It will also secure our market leadership in Scandinavia in offering world leading technology for physical properties”.
